Dear Dick:

25X1A

As you are aware, as a part of our local flight tests and also as a cover for them we conducted some tests of aerial targets using a standard Air Force-Fairchild T-11 camera. This was done using [redacted] office. Some of the results of those tests are given in our Engineering Report 7180, The Correction of Aerial Photographic Tests for Atmospheric Scattering, attached, which we would like to have published in the magazine "Photographic Science and Engineering". If this meets with your approval, we will coordinate it with Wright Field. We would appreciate your comments as to whether you feel we should cite the AF contract number or not and anything further you may wish to add.

Regards,
